

Earth Science Course Files

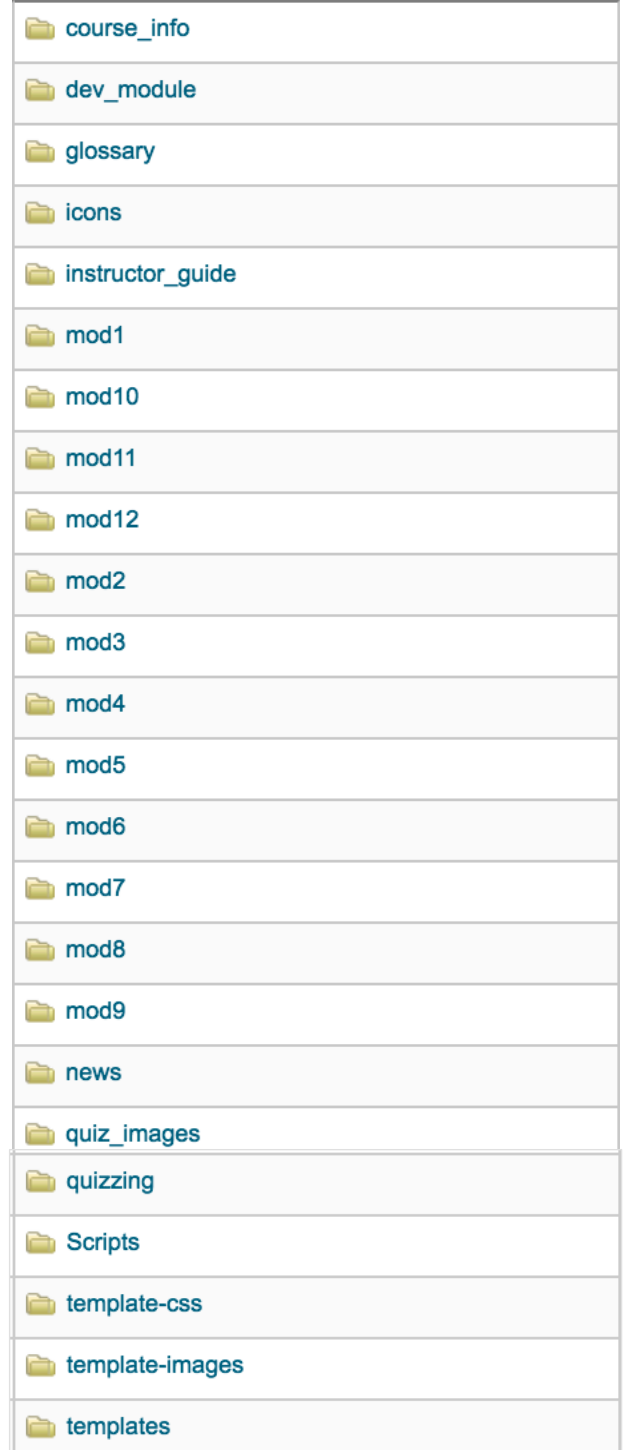

Installation Directions

The Earth Science course files are available for download to use in a variety of instructional settings. You may download select sections or the entire set of files. If you download all of the sections, some folders will be repeated at the site level (i.e. course_info, dev_module, glossary, icons, news, quiz_images, quizzing, Scripts, template-css, template-images, templates, etc.). You only need to maintain one copy of each. The file structure should look like the image on the right:

If you choose to download select modules, the .zip file will contain the following:

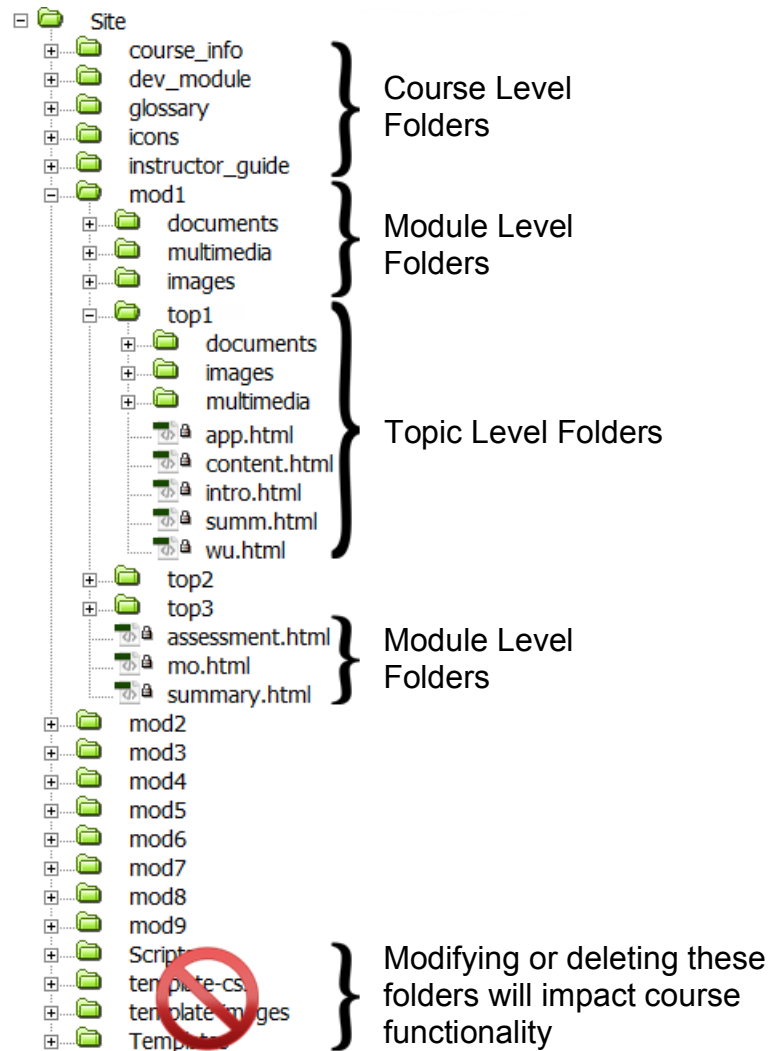

Visit the Instructor's Guide to view important information about the contents of this course. This course has been designed using rapid e-learning software. This technology allows you to view all of the course components on different types of devices. The software is smart. It will deliver interactivities in a format that is compatible with your device, making this course fully functional on a desktop computer, laptop, tablet, mobile device or a smartphone.

Earth Science Course Files

Installation Directions

This course utilizes the following file structure:

Folder Contents

Each folder in the course file structure contains a specific set of files necessary to course functionality:

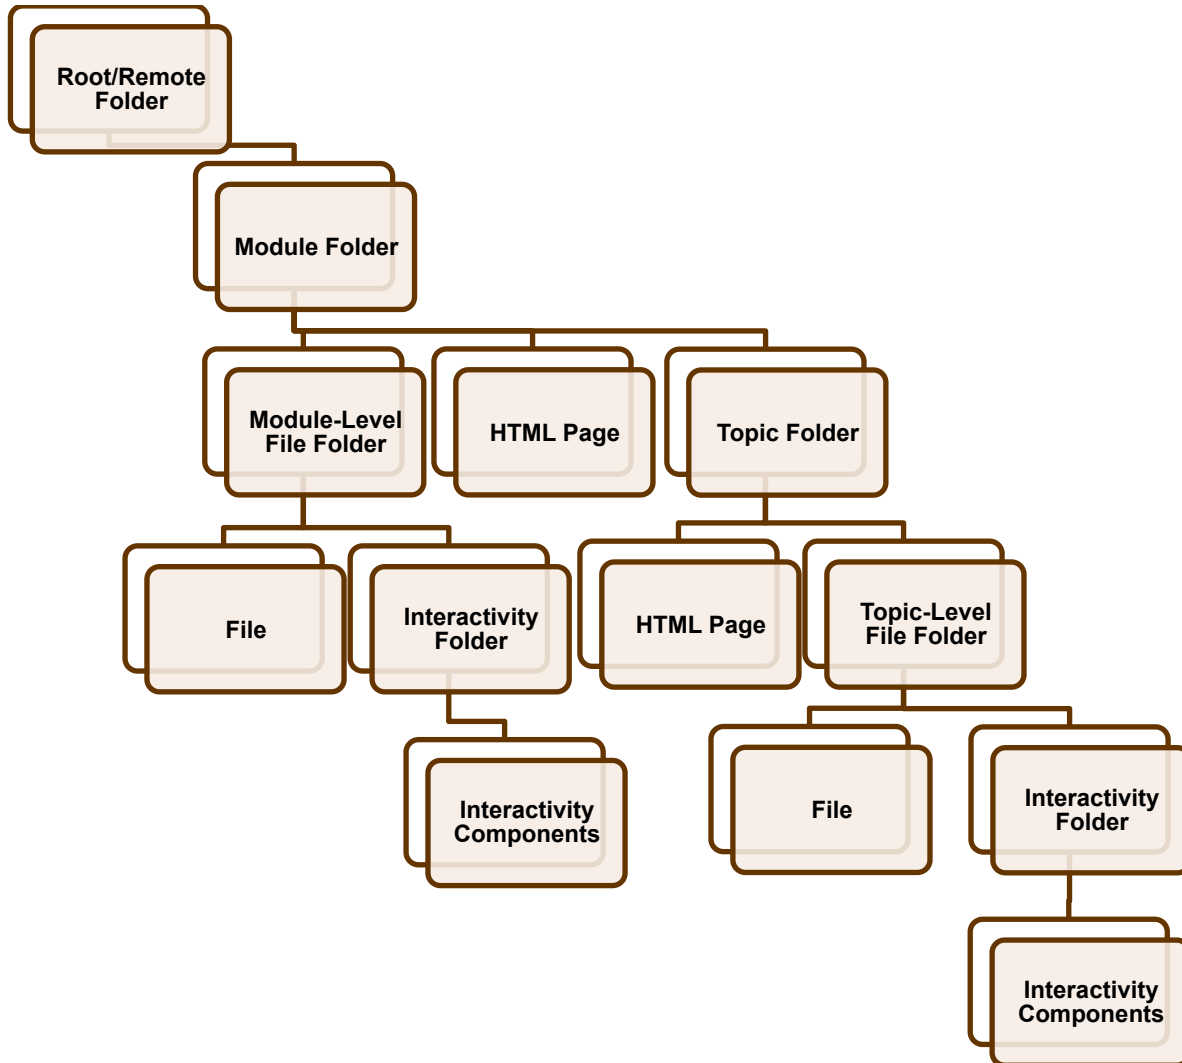

- **Documents** – DOC and PDF files of printable course documents, answer keys, assignment templates, and printable versions of interactivities, assignments, checklists and rubrics, SMI or other closed-captioning files (any items that will be downloaded by students or instructors)
- **Multimedia** - Final copies of interactivities, presentations, and quizzes; any video clips or videos (.mov or .mp4)
- **Images** - Any final graphics

Please Note: For each topic folder, there is only one intro.html, wu.html, content.html, app.html, or sum.html file.

Earth Science Course Files

Installation Directions

Folders are nested using the following structure:

Here is an example of a linked module:
